

Acme Corp — Annual Report, Fiscal Year 2024

Item 1. Business Overview

Acme Corp is a fictional company created solely to test a document ingestion pipeline. It designs and sells industrial adhesives and fasteners across North America and Europe. The company was founded in 1998 and operates three manufacturing facilities. This document contains no real financial data and describes no real company.

The company's fiscal year ends December 31. Management believes the business remains well positioned in its core markets, supported by long-term supply agreements with several large industrial customers.

Item 7. Management's Discussion and Analysis

Total revenue for fiscal year 2024 was \$22.1 million, an increase of 8% from the prior year's total revenue of \$20.5 million. The increase was primarily driven by higher unit volumes in the industrial fasteners segment, partially offset by pricing pressure in adhesives.

Operating expenses increased modestly year over year, reflecting continued investment in the company's sales organization. Management does not expect a material change in the cost structure over the next twelve months.

Item 8. Financial Statements

The following table summarizes selected balance sheet metrics for fiscal years 2024 and 2023:

Metric	FY2024	FY2023
Total Assets	\$145.3M	\$132.7M
Total Liabilities	\$67.2M	\$61.4M
Total Equity	\$78.1M	\$71.3M
Debt-to-Income Ratio	34%	31%

The Debt-to-Income Ratio increased slightly year over year, which management attributes to financing for the expansion of the third manufacturing facility.

Item 9A. Controls and Procedures

Management, including the principal executive and financial officers, evaluated the effectiveness of the company's disclosure controls and procedures as of the end of the period covered by this report. Based on that evaluation, management concluded that the company's disclosure controls and procedures were effective.

There were no changes in internal control over financial reporting during the fiscal year that materially affected, or are reasonably likely to materially affect, internal control over financial reporting. This document does not disclose executive compensation figures.
